Re: International Application N. PCT/IB2004/003877
Applicant: NUOVA PANSAC S.p.A.
Our Ref: 0416/RP

Please find enclosed the following items:

- Demand for the above mentioned International application;
- Request for amendments under A. 34 PCT and Rules 66.8 and 91.1 PCT;
- Form PCT/IPEA/401;
- Bank order for the payment of the relevant fees (copy).

Yours Faithfully

Rok PREMUR

International Application N. PCT/IB2004/003877

Request for amendments under A. 34 PCT and Rules 66.8 and 91.1 PCT.

With reference to the above mentioned International Application it is hereby requested to amend the translation of the application as follows.

- 1) In the abstract the words "*blow molding*" (Abstract, line 1) should be amended as to read "*blown film extrusion*" (the original Italian text is "*estrudere in bolla*").
- 2) the International application as published at page 1 lines 11-12 the words "*producing a tubular by blow extrusion molding*" should be amended as to read "*producing a tubular by blown extrusion*" (the original Italian text is "*estrudere un tubolare in bolla*").
- 3) In the International application as published at page 4 line 3 the words "*The mixture is extruded with a blown film line*" .." should be amended as to read "*The mixture is blow extruded ..*" (the original Italian text is "*Tale miscela è estrusa in bolla (c.d. blown extrusion) ...*").
- 4) In the application as originally filed at page 4 lines 8 the words "*The blow extrusion molded tubular 10..*" should be amended as to read "*The blown extrusion tubular ..*" (the original Italian text is "*Il tubolare estruso e gonfiato ..*").
- 5) In claim 1 the words "*blow molding a mixture*" should be amended as to read "*a blown film extrusion of a mixture*" (the original Italian text is "*estrudere in bolla una miscela*").
- 6) In claim 10 the words "*a blow molding extruder*" should be amended as to read "*a blown film extruder*" (the Italian text is "*un estrusore in bolla*").

Even without taking into account the original application in Italian language a skilled reader would derive directly and unambiguously, using common general knowledge, from the whole of the documents forming the content of the application that the term "*molding*" is incorrect since what is disclosed and claimed is a method and a plant for producing a continuous film, whereas the extrusion

blow-molding is a process for the production of hollow components (bottles, jars, jugs, etc) for cosmetic, medical and food industries.

Moreover this kind of extrusion process is defined as making a product by forcing the molted material through an orifice to the mould and it is consequently clear that the object of the above mentioned International Application is not a plant and a process for blow molding, but a process and a plant for extruding.

If further clarification are deemed necessary by the Examiner, an informal telephone interview is hereby requested by the Applicant.

Respectfully submitted

Rok PREMUR
